

Sturgeon Public Schools: Counselling and Wellness Plan 24-

25

Vision & Mission

Sturgeon Public Schools: where, through a well-rounded education, students are motivated and supported to pursue their unique path to future success. Working together as a team of trustees, parents, community, staff and students, we create safe, respectful and collaborative learning environments where students are prepared to meet, and excel at, the challenges presented by the global community.

The priority of Sturgeon Public Schools is student achievement. The domains of Teaching and Leading, Learning Supports and Governance support this priority and integrate local context to ensure Sturgeon Public students achieve. Each domain is interconnected and part of a complete system supporting student achievement.

Services and supports addressed within the counselling and wellness plans, fall most directly in two domains: Learning Supports and Local and Societal Context. Many

of the counselling resources and strategies are specifically directed at addressing the social emotional and mental health needs of our students.

Sturgeon Public Schools has identified the following outcomes and strategies with respect to each domain:

Learning Supports: Safe Caring, Respectful and Inclusive

Outcomes:

- Public School Communities are safe, caring, respectful and inclusive
- First Nations, Métis, and Inuit students achieve and succeed as part of a community committed to understanding foundational Indigenous perspectives and knowledge
- Partnerships with external agencies are in place and used to enhance the conditions required for student achievement

Division Strategies:

- Schools foster welcoming learning environments and implement supports for physical, social, mental and emotional wellness in students
- Schools provide diverse programming to ensure the success of all students in an inclusive learning environment
- Schools implement and improve strategic plans to ensure understanding of Indigenous perspectives and knowledge
- Sturgeon Public Schools will ensure that partnerships are developed and maintained to support student health and wellness

Local and Societal Context: Addressing social/emotional and mental health needs

Outcomes:

Sturgeon Public Schools: Counselling and Wellness Plan 24-

25

- Students demonstrate respect for themselves and others and show pride in their accomplishments and in their community
- Students and staff model integrity and work ethic

Specific strategies to support outcomes are identified within the national Comprehensive School Health model to address wellness within our schools. This whole-school approach incorporates well-being as an essential aspect of student achievement. Actions addressed in four distinct but interrelated components comprise a comprehensive school health approach include:

- Social and Physical environments
- Teaching/Learning
- Policy
- Partnerships and Services

This approach recognizes it takes a whole school community to support wellness. Wellness education nurtures the whole child and enhances students' capacity for achieving their full potential intellectually, physically, socially, spiritually, and emotionally (Alberta Education).

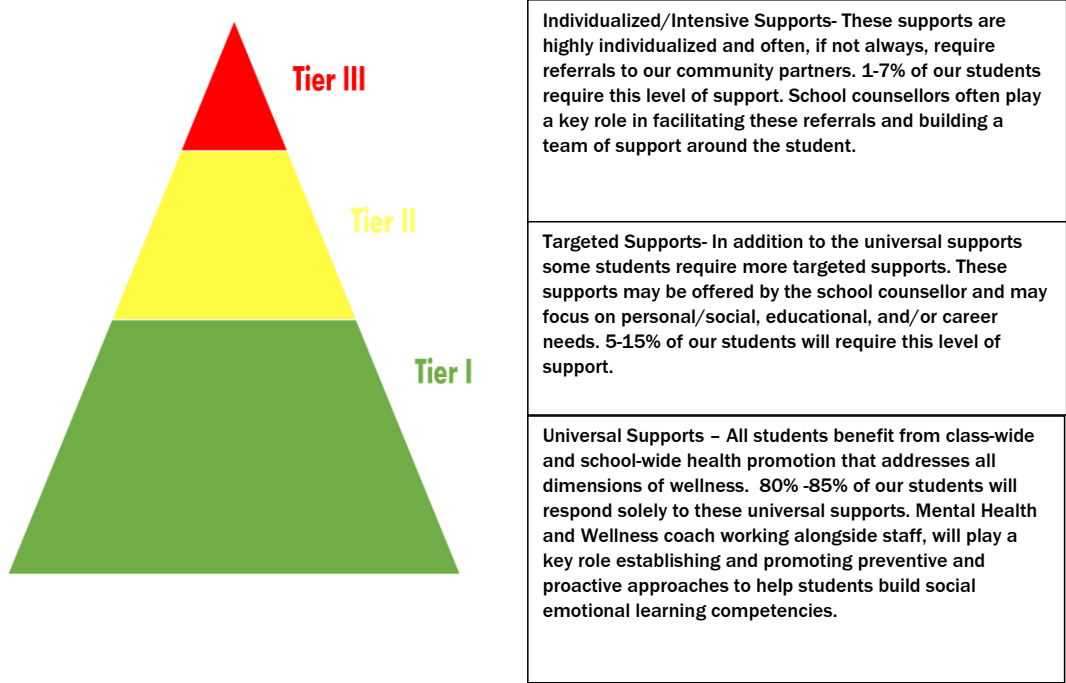

Each

school has a Counselling and Wellness Plan which is developed for all students and focuses on the six dimensions of wellness. This plan provides a balanced approach, offering developmental preventative activities and learning opportunities for all students as well as appropriate and timely interventions for individual students that require higher levels of support. This plan is a joint responsibility of the entire school staff. The school counsellor takes the lead on developing the plan, coordinating services, and providing direct and indirect support to students, staff, and parents/guardians. Successful implementation of a comprehensive Counselling and Wellness Plan positively impacts student outcomes in the areas of achievement, mental health, social emotional learning, attendance, high school completion rates and career knowledge.

Pyramid of Supports / Interventions

Sturgeon Public Schools use a Pyramid of Supports/Interventions to outline specific programming that supports wellness within our schools. This includes building collaborative relationships with home, school and the community. Schools use divisional data and their own school data to drive decisions regarding specific programming.
